EDUCATION

Bachelor of Arts Psychology

University of California, Santa Barbara, Santa Barbara, CA

Sep 2008 - Jun 2012

WORK EXPERIENCE

Sales Engineer

AnCAD, Inc., Taipei, Taiwan

Dec 2013 - Aug 2015

- Identified ways to utilize data visualization to better help clients understand potential areas in which data analytics can benefit them when customized to their unique specifications.
- Handled all aspects of technical writing, including technical documentation, bug reports, and version update logs.

Patent Specialist

IPPLUS Patent Office LLP, Taipei, Taiwan

Jan 2013 - Dec 2013

- Collaborated with team of patent engineers to expedite related processes in obtaining a patent, researching prior art, and protecting intellectual property.
- Coordinated final overview and proofread of both Utility and Design patent cases which included translations and technical writing for protecting intellectual property.

TECHNICAL PROJECTS

Dog Eats React, Context API, MongoDB, Express.js

dog-eats.com

Designed and launched Dog Eats, a web application that allows users to easily determine whether or not their dog can eat a certain food through searching a database of foods that is constantly being updated and maintained.

Video Blackjack React

jteng1.github.io/blackjack/

A web application built with React and DeckofCards API that is inspired by the Blackjack machines played in Las Vegas! Implemented with chip betting, double-down, and game statistics for an authentic experience.

Contact Keeper React, Context API, MongoDB, Express.js

github.com/jteng1/contact-keeper

A web application that allows users to store and organize a list of contacts that are unique to each account. Users have full CRUD functionality on each contact with the ability to search through their contact list by name, e-mail, phone, and type.

IT Log Tracker React, Redux, Material-UI, MongoDB, Express.js

github.com/jteng1/it-logger

A web application that allows computer repair shops to easily and effectively manage a central system where all repair logs are stored. Technicians are able to add/edit/delete logs, mark them as urgent or solved, and keep track of when/who updated a log.

SKILLS

Technical
Soft

JavaScript (ES6), Python 3, React / Redux / Context API, Node.js, MongoDB, HTML5, CSS3, Git
Leadership, Initiative, Resourcefulness, Grit, Bilingual Communicator (English, Chinese)
