TECHNICAL PROJECTS

Dog Eats *React.js, Context API, MongoDB, Express.js* dog-eats.com

Launched Dog Eats, a single page web application that lets users quickly determine whether or not a dog can eat certain foods by searching through a tailored database of foods. Implemented with Context API and a RESTful API back-end with authentication to give admin accounts ability to manage database efficiently.

Video Blackjack *React.js* jteng1.github.io/blackjack

Developed Video Blackjack, a progressive web application built with React.js and DeckofCards API that is inspired by Blackjack machines played in Las Vegas! Features chip betting, double-down option, and game statistics for an authentic experience.

Contact Keeper *React.js, Context API, MongoDB, Express.js* github.com/jteng1/contact-keeper

Designed a web application and RESTful API back-end with authentication that allows users to store and organize a list of contacts unique to each account. Users have CRUD functionality and ability to search through list by name, e-mail, phone, and type.

IT Log Tracker *React.js, Redux, Material-UI, MongoDB, Express.js* github.com/jteng1/it-logger

Built a log management web application that allows repair centers to effectively manage a central list of logs that can be viewed and updated. Architected RESTful API back-end to give technicians CRUD functionality, ability to mark logs as urgent or solved, and keep track of who and when logs are updated. Utilized Redux for state management and Material-UI for front-end design.

EDUCATION

Bachelor of Arts Psychology Sep 2008 - Jun 2012

University of California, Santa Barbara, Santa Barbara, CA

WORK EXPERIENCE

Sales Engineer Dec 2013 - Aug 2015

AnCAD, Inc., Taipei, Taiwan

- Identified ways to utilize data visualization to better help clients understand potential areas in which data analytics can benefit when customized to specific use case scenarios.
- Handled all aspects of technical writing, including technical documentation, bug reports, and version update logs.

Patent Specialist Jan 2013 - Dec 2013

IPPLUS Patent Office LLP, Taipei, Taiwan

- Collaborated with team of patent engineers to expedite related processes in obtaining a patent, researching prior art, and protecting intellectual property.

SKILLS

Technical	JavaScript (ES6), Python 3, React / Redux / Context API, Node.js, MongoDB, HTML5, CSS3, Git
Soft	Leadership, Initiative, Resourcefulness, Grit, Bilingual Communicator (English, Chinese)
